TRENDS IN GENETICS

REFERENCE EDITION

Volume 2

1986

CONTENTS

JANUARY

Monitor
Genetics of mate choice, *by L. Partridge* 1
Growth factors, receptors and oncogenes, *by Gerard Evan* 2
The cystic fibrosis gene mapped, *by Peter S. Harper* 3
Mapping a chromosome to find a gene, *by Veronica van Heyningen and David J. Porteous* 4
Mutagenic activity of transforming genes, *by Paolo Sassone-Corsi* 6

Technical Tips 7

Letters to the Editor
Limits on the number of loci in the genome, *from John A. Sved* 8
The total number of genes in the mammalian genome, *from Susumu Ohno* 8

Reviews
Pluripotential stem cell lines as a route into the mouse germ line, *by E. J. Robertson* 9
Genetic control of sexual behavior in *Drosophila melanogaster, by Laurie Tompkins* 14
The peculiar genetic organization of *Drosophila* heterochromatin, *by Sergio Pimpinelli, Silvia Bonaccorsi, Maurizio Gatti and L. Sandler* 17
Variability of antigen genes in African trypanosomes, *by Etienne Pays* 21
Bacteriophage λ development: temporal switches and the choice of lysis or lysogeny, *by Harrison Echols* 26

Book Review
Higher Order Structure in the Nucleus (*J. Cell Sci.*, Suppl. 1) (P. R. Cook and R. A. Laskey, eds) *by Paul A. Fisher* 31

FEBRUARY

Monitor
Genes within genes, *by Kevin O'Hare* 33
Chloroplast recombination, *by Christopher J. Howe* 34

Technical Tips 35

Perspectives
The threefold subdivision of segments and the initiation of legs and wings in insects, *by Hans Meinhardt* 36
Genetic error and genome design, *by Darryl C. Reanney* 41

Reviews
Molecular embryology in amphibians: new approaches to old questions, *by Igor B. Dawid and Thomas D. Sargent* 47
RNA catalysis in the excision of yeast mitochondrial introns, *by H. F. Tabak and L. A. Grivell,* 51
Genetics of DNA repair in bacteria, *by Nina Ossanna, Kenneth R. Peterson and David W. Mount,* 55

MARCH

Monitor
Antimutagenesis and anticarcinogenesis: progress without molecular mechanisms, *by Elizabeth K. Weisburger* 59

Perspectives
Molecular mechanisms of gene conversion in higher cells, *by Philippe Kourilsky* 60
Cross-species gene transfer: a major factor in evolution? *by Michael Syvanen* 63

Technical Focus
Activity gels for analysing DNA processing enzymes, *by Umberto Bertazzoni, A. Ivana Scovassi, Mauro Mezzina, Alain Sarasin, Elisabetta Franchi and Raffaella Izzo* 67

Reviews
NCAM: the molecule and its genetics, *by Urs Rutishauser and Christo Goridis* 72
The recent evolution of mammalian repetitive DNA elements, *by Prescott L. Deininger and Gary R. Daniels* 76
Normal and activated *ras* oncogenes and their encoded products, *by Arthur D. Levinson* 81

APRIL

Monitor
The case of the missing H-Y antigen, *by P. N. Goodfellow* 87

Technical Tips 88

Reviews
The mutants of *Arabidopsis*, *by M. A. Estelle and C. R. Somerville* 89
Proto-oncogene *fos*: a multifaceted gene, *by Inder M. Verma* 93
Nuclear gene products required for translation of specific mitochondrially coded mRNAs in yeast, *by Thomas D. Fox* 97
Terminase and the recognition, cutting and packaging of λ chromosomes, *by Michael Feiss* 100
Chromosome abnormalities in human reproductive wastage, *by Terry J. Hassold* 105

Retrospectives
The Elixir of Life, *by Jan Witkowski* 110

Book Review
Genetic manipulation of *Streptomyces*: A Laboratory Manual (D. A. Hopwood, M. J. Bibb, K. F. Chater, T. Kieser, C. J. Bruton, H. M. Kieser, D. J. Lydiate, C. P. Smith and J. M. Ward), *by Julian Davies* 113

MAY

Monitor
A U-turn in the regulation of transcription? *by Kim Nasmyth* 115

Technical Tips 117

Reviews
The mechanism and consequences of retrotransposition, *by Gerald R. Fink, Jef D. Boeke and David J. Garfinkel* 118
Cancer-prone hereditary diseases with DNA processing abnormalities, *by Philip C. Hanawalt and Alain Sarasin* 124
Inherited 5α-reductase deficiency in man, *by Julianne Imperato-McGinley and Teofilo Gautier* 130
A consideration of the origin of processed pseudogenes, *by Michael Wagner* 134
Molecular genetics in the domestic cat and its relatives, *by Stephen J. O'Brien* 137

Book Review
Molecular Cell Genetics (Michael M. Gottesman), *by Catrin Pritchard* 143

JUNE

Monitor
The mouse *t* complex is composed of two separate inversions, *by John H. Rogers* 145
A molecular season for descriptive embryology, *by Alfonso Martinez-Arias* 146
Senescence comes of age, *by R. Benne and H. F. Tabak* 147

Perspectives
Cystic fibrosis: from linked markers to the gene, *by David J. Porteous and Veronica van Heyningen* 149
Views of limb development and regeneration, *by Susan V. Bryant and Ken Muneoka* 153

Reviews
Molecular drive in multigene families: how biological novelties arise, spread and are assimilated, *by Gabriel A. Dover* 159
Genetic manipulation of hematopoietic stem cells with retrovirus vectors, *by John E. Dick, Maria Cristina Magli, Robert A. Phillips and Alan Bernstein* 165

JULY

Monitor
Early developmental decisions: a new-style comparative approach, *by C. C. Wylie* 171

Letters to the Editor
Genetic errors and gene redundancy, *from Gabriel A. Dover* 172
Reply, *from Darryl C. Reanney* 173

Technical Tips 173

Perspectives
Jumping libraries and linking libraries: the next generation of molecular tools in mammalian genetics, *by Annemarie Poustka and Hans Lehrach* 174

Reviews
Structure and function of T lymphocyte differentiation antigens, *by Jane R. Parnes* 179
Mu transposons in maize, *by Marcella Lillis and Michael Freeling* 183
Mutagens, oncogenes and cancer, *by Mariano Barbacid* 188

Book Reviews
Genetic Analysis of Animal Development (Adam S. Wilkins), *by Ian Jackson* 193
Human Embryology (F. Beck, D. B. Moffat and D. P. Davies), *by M. H. Kaufman* 193

AUGUST

Monitor
Negative transcriptional regulation of c-*myc*, *by Daniel Linzer* 195
Promoters for housekeeping genes, *by William S. Dynan* 196
Haemopoiesis in Heidelberg, *by Nick Gough* 197

Letters to the Editor
Close linkage of mouse genes for salivary proline-rich proteins (PRPs) and taste, *from Edwin A. Azen, Ian E. Lush and Benjamin A. Taylor* 199

Technical Tips 200

Reviews
Steroid sulphatase and the conservation of mammalian X chromosomes, *by Ian W. Craig and Elinor Tolley* 201
Molecular mechanisms of suppression in *Drosophila, by Eric Kubli* 204
Cytochrome P-450s: polymorphic multigene families involved in carcinogen activation, *by C. R. Wolf* 209
Transcriptional regulation by *trans*-acting factors, *by Paolo Sassone-Corsi and Emiliana Borrelli* 215

Book Reviews
Population Genetics (F. B. Christiansen and M. W. Feldman), *by L. L. Cavalli-Sforza* 220
Chorionic Villus Sampling: Fetal Diagnosis of Genetic Diseases in the First Trimester (Bruno Brambati, Giuseppe Simoni and Sergio Fabro, eds), *by Barbara R. Migeon* 220

SEPTEMBER

Monitor
Termination of replication of bacterial chromosomes, *by Phillip Nagley* 221
Introns between protein domains: selective insertion or frameshifting? *by John Rogers* 223
Homeoboxes: what do they do? *by Rex L. Chisholm* 224

Letters to the Editor
Setting the record straight, *from Krishna R. Dronamraju* 225

Technical Tips 226

Genetics Online
Cross-sections of the GenBank database, *by Brian T. Foley, Debra Nelson, Maura T. Smith and Christian Burks* 233

Reviews
Papillomavirus genomes: from sequence data to biological properties, *by Isabelle Giri and Olivier Danos* 227
Molecular biology of self-incompatibility in plants, *by Mikhail E. Nasrallah and June B. Nasrallah* 239
The activation of cellular oncogenes by retroviral insertion, *by Roel Nusse* 244

Book Review
Plasmids of Eukaryotes (K. Esser, U. Kück, C. Lang-Hinrichs, P. Lemke, H. D. Osiewacz, U. Stahl and P. Tudzynski), *by Stephen G. Oliver* 248

OCTOBER

Monitor
Mouse genetics at a Swiss monastery, *by Nick Hastie* 249
The *mas* oncogene, *by Bernd Groner* 250
Soundings at the PKU locus, *by Charles R. Scriver* 251
Ubiquitous promoter in transgenic mice, *by Grahame Bulfield* 253
An up-to-date human gene map, *by Kay E. Davies* 253

Technical Tips 254

Reviews
Developmental rearrangement of cyanobacterial nitrogen-fixation genes, *by Robert Haselkorn, James W. Golden, Peter J. Lammers and Martin E. Mulligan* 255
erb-B: growth factor receptor turned oncogene, *by Michael J. Hayman* 260
Gene expression and recombination in plant mitochondrial genomes, *by R. Michael Mulligan and Virginia Walbot* 263
Control of cell-type generation mediated by growth factor, *by Tuneo Yamada* 266

Book Reviews
Methodology in Medical Genetics: an Introduction to Statistical Methods (Alan E. H. Emery), *by Andrew P. Read* 269
Advances in Human Genetics Vol. 15 (H. Harris and K. Hirschhorn, eds), *by Joy D. A. Delhanty and Mary B. Davis* 269
Human Growth, 2nd edition (F. Falkner and J. M. Tanner, eds), *by M. H. Kaufman* 270

NOVEMBER

Monitor
Where next for mammalian male-specific (H–Y) antigen(s)?, *by Alistair Stewart* 273
DNA helicase activity of SV40 large T antigen, *by Gerald Gough and David Lane* 274
Gene amplification in pesticide-resistant insects, *by O. Hyrien and G. Buttin* 275
Regulation of cell division by peptide hormones of *Saccharomyces cerevisiae, by Jasper Rine* 276

Technical Focus
Pulsed field gel electrophoresis: a technique for fractionating large DNA molecules, *by R. Anand* 278

Reviews
Antisense RNA regulation in prokaryotes, *by Ophry Pines and Masayori Inouye* 284
Some evolutionary consequences of the molecular recombination process, *by John F. Leslie and Ward B. Watt* 288
Transposable elements in *Antirrhinum majus*: generators of genetic diversity, *by Enrico S. Coen and Rosemary Carpenter* 292

Book Reviews
Molecular Cell Biology (James Darnell, Harvey Lodish and David Baltimore), *by Ron Laskey* 297
Developmental Biology: A Comprehensive Synthesis. Vol. 2 The Cellular Basis of Morphogenesis (Leon W. Browder, ed.), *by J. B. Gurdon* 297
Manipulating the Mouse Embryo: A Laboratory Manual (B. Hogan, F. Constantini and E. Lacy), *by Martin Johnson* 298
Molecular Structure of the Number 21 Chromosome and Down Syndrome (George F. Smith, ed.), *by Peter Harper* 298

Books Received 298

DECEMBER

Monitor
The genetic basis of neoplasia: the retinoblastoma paradigm, *by Webster K. Cavenee* 299
How to drive an egg, *by Gabriel A. Dover* 300
Retroviral mosaics: a new approach to cell lineage analysis in the mouse embryo, *by J. Rossant* 302
Naturally occurring complementary transcripts: do they function as anti-sense RNA? *by Dimitris Kioussis and Frank Grosveld* 304
't-party' at the Jackson Laboratory, *by Keith Willison* 305

Technical Tips 306

Reviews
Phenotypic consequences of environmentally induced changes in plant DNA, *by C. A. Cullis* 307
Genetics of polyploid *Xenopus, by Hans Rudolf Kobel and Louis Du Pasquier* 310
Dosage compensation in *Drosophila, by Elizabeth Jaffe and Charles Laird* 316

Retrospectives
Possible worlds: contributions of J. B. S. Haldane to genetics, *by Krishna R. Dronamraju* 322

Book Reviews
Molecular Biology and Crop Improvement: A Case Study of Wheat, Oilseed Rape and Faba Beans (R. B. Flavell, I. E. Henson and H. J. B. Lowe), *by Robert Shields* 325
Genetic Engineering of Animals: an Agricultural Perspective (J. Warren Evans and Alexander Hollaender, eds), *by James E. Womack* 325
Human Genetic Diseases: A Practical Approach (Kay E. Davies, ed.), *by R. Williamson* 326
Genetic Biochemical Disorders (P. F. Benson and A. H. Fensom), *by Mira Irons and Harvey L. Levy* 326
